RESOLUTION NO. 2001-99
(17th Regular Session)

RESOLUTION ENACTING AN ORDINANCE TO ADOPT A DECENTRALIZED SYSTEM OF COLLECTION AND DISPOSAL OF GARBAGE AND OTHER WASTE MATERIALS, ESTABLISHING A SANITARY LANDFILL FOR EVERY BARANGAY AND PROVIDING FUNDS THEREFOR.

WHEREAS, garbage collection and disposal has now become a pressing and an alarming problem especially those from highly urbanized barangays and would reach to a threatening or more serious level if left un-acted upon;

WHEREAS, concentrating the disposal of garbage and other waste materials in one area or barangay, as already happening in most places, poses a great environmental risk, hazard and even a psychological, ecological and material damage to the affected barangay to the detriment of its people.

WHEREAS, the burden of properly managing household, industrial and other solid wastes should be shared by every individual and be the responsibility of every barangay rather than being left to the municipal authorities or passed on to a single barangay.

WHEREAS, establishing a garbage dumpsite or sanitary landfill in every barangay would cushion the impact and volume of garbage thus limiting its negative effects to the environment to health and proper sanitation among others as well as the cost of transporting them from one barangay to another.

WHEREFORE, on motion of Hon. Jerson S. Leyson and unanimously seconded by all of the members present,

BE IT RESOLVED, that the subject ordinance herein presented be adopted by this August Body and is hereby enacted, thus:

ORDINANCE NO. 2001-180
(17th Regular Session)

AN ORDINANCE ADOPTING A DECENTRALIZED SYSTEM OF COLLECTION AND DISPOSAL OF GARBAGE AND OTHER WASTE MATERIALS, ESTABLISHING A SANITARY LANDFILL FOR EVERY BARANGAY AND PROVIDING FUNDS THEREFOR.

BE IT ORDAINED by the Sangguniang Bayan of Manolo Fortich, Bukidnon in session that:

SECTION 1. There shall be established in every barangay a sanitary landfill or garbage dumpsite to which garbage and other waste materials will be disposed of subject to the conditions herein set forth.

Garbage and solid waste management shall be the responsibility of each barangay.

SECTION 2. DEFINITION OF TERMS. As used in this Ordinance:

Garbage and Other Waste Materials shall mean household items and things, commercial, industrial, residential or agricultural waste products and all other items considered to be of no use or value and which can no longer be recycled, reuse, reduce or segregated other than for final disposal.

Sanitary landfill or garbage dumpsite shall mean a parcel of land duly identified and approved by competent authorities to serve as a final disposal of garbage and other solid wastes.

Highly urbanized barangays shall mean those barangays whose population and development have already far exceeded so that it would be highly improbable for authorities to identify or approve a sanitary landfill therein without necessarily and seriously affecting or damaging the health and safety of the residents and their environment, e.g. Baranagay Agusan Canyon and Damilag.

Urbanized barangays shall mean those barangays whose population and development require the establishment of a landfill site for its own use whether it be situated within its own or in another barangay.

Zero waste management shall mean that system of eliminating or reducing garbage to its lowest possible limit through the process of recycling, segregating, shredding, sorting, composting of garbage and waste materials or even through the imposition of garbage collection fees.

SECTION 3. It shall be the responsibility of every barangay to dispose of their garbage and other solid wastes in their own barangay PROVIDED HOWEVER, that highly urbanized barangays who could not identify their own sanitary landfill may enter into an agreement with the adjacent or other Barangay in which their volumes of garbage may be accommodated and in consideration of which the said barangay shall be obliged to pay an agreed amount in favor of the barangay so accommodating.

SECTION 4. The actual collection and disposal of garbage shall be the primary responsibility of the municipality in coordination with the concerned barangay subject to the usual garbage fees and charges which are being imposed under existing ordinance against residents, establishments, homeowners and market associations and other which shall accrue directly to the municipal coffers.

SECTION 5. The selection, identification and pre-qualification of the respective sanitary landfill not lesser than one hectare in land area shall be undertaken by the Barangay concerned in cooperation with the municipality thru the Municipal Planning and Development Office, the general services and/or engineering division using the criteria laid down under existing laws by the Department of Environment and Natural Resources (DENR) who shall finally determine its viability and after taking into consideration all the social, environmental, cultural and economic acceptability.

SECTION 6. There shall be funds appropriated for the acquisition of lands duly identified and approved for this purpose including funds for the improvement and maintenance of the necessary roads and easy access to and from the landfill site and the provision of equipment for the effective, ecological and efficient implementation of this Ordinance.

SECTION 7. Implementation shall consist of four phase as follows:

FIRST PHASE. The selection, identification and acquisition of not less than three (3) landfill sites to be used temporarily by the ten (10) highly urbanized barangays such as Barangays Agusan Canyon, Alae, Dalirig, Damilag, Dicklum, Lunocan, Maluko, Mambatangan, San Miguel and Tankulan which shall be clustered.

SECOND PHASE. The selection, identification and acquisition of not less than six (6) landfill sites cumulative of the first phase to be used temporarily by the ten (10) barangays above-mentioned and clustered anew and other barangays that maybe considered either as highly urbanized or urbanized.

THIRD PHASE. The selection, identification and acquisition of not less than ten(10) landfill sites cumulative of the first and second phases to be used permanently by the foregoing ten or temporarily by other barangays under a new clustering.

FOURTH & FINAL PHASE. The selection, identification and acquisition of the landfill sites for other barangays with a view that all barangays shall have their own sanitary landfill or dumpsites.

SECTION 8. Nothing in this Ordinance shall be construed to amend, supersede or modify existing laws and ordinances with respect to ecological and solid waste management, zero waste management, clean and green and environmental protection.

SECTION 9. This Ordinance shall take effect fifteen (15) days upon approval.

This Ordinance was passed and approved on motion of Hon. Jerson S. Leyson and unanimously seconded by all of the members present.
